Table S9. UTR Replacements in Primates and Rodents
One hundred and forty-nine UTR replacements distributed among different species were detected.

|  | 5' UTRs |  | 3' UTRs |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Number of <br> observed <br> replacements | Number of <br> sequences <br> analyzed | Number of <br> observed <br> replacements | Number of <br> sequences <br> analyzed |
| Homo sapiens | 14 | 977 | 9 | 1,725 |
| Pan troglodytes | 2 | 195 | 14 | 95 |
| Macaca | 10 | 158 | 3 | 402 |
| Macaca mulatta | 25 | 987 | 3 | 53 |
| Mus musculus | 21 | 744 | 29 | 1,713 |
| Rattus norvegicus | 72 | 3,061 | 19 | 1,289 |
| Total |  | 77 | 5,277 |  |
