Figure A: Graph showing body weight (g) over age (d) for Normal and Restricted groups. Normal group (n = 22) and Restricted group (n = 28).

Figure B: Bar graphs showing leptin (ng/mL) and GHRH mRNA (au) levels over age (10 days and 20 days).

Figure C: Bar graphs showing GH (ng per pituitary) and IGF-I (ng/mL) levels over age (10 days and 20 days).
