

# Clustered Orphan + Annotated proteins

**FigureS5 – Clustered annotation terms and functional neighborhoods.**

Complete dendrogram showing the functional relatedness and listing of the functional categories (y-axis) associated with the 2D 'clustergram' shown in Figure 5A based on the functional predictions and existing annotations for all the orphan and annotated proteins of *E. coli*. The single letter code (italic font) shown before each functional term indicates COG (C), MultiFun (M) and GO (G) derived categories, respectively.
