

**Table S18: Overlapping of CTCF binding sites with Transposable Elements**

	All	<i>D. mel</i> lineage specific sites	other sites
Overlapping with TE	27	15	12
Not overlapping with TE	2240	246	1994
Total	2267	261	2006
Percentage of overlapping	1.19%	5.75%	0.60%

Note: We used the CTCF-201bp sites to identify the number of sites overlapping with annotated transposable elements in *Drosophila melanogaster* genome.
