S3 Fig. Comparison of agronomic traits.

Comparison of (A) plant height, (B) grain length, (C) grain width and (D) 1,000-grain weight and (E) panicle length between NIL-\textit{GNP}\textsubscript{1LT} and NIL-\textit{GNP}\textsubscript{1TQ}. Values are means ± s.d. (n = 18). Comparison of (F) primary branch number (PBN) and secondary branch number (SBN) between NIL-\textit{GNP}\textsubscript{1LT} and NIL-\textit{GNP}\textsubscript{1TQ}. Values are means ± s.d. (n = 150). Comparison of (G) primary branch number (PBN) and secondary branch number (SBN) between Lemont (LT) and Teqing (TQ). Values are means ± s.d. (n = 150).
