The graph shows the fraction of cells alive over time for different genotypes. The genotypes are:

- Wild-type
- atf-7(qd22)
- atf-7(qd22 qd130)
- atf-7(qd22)/atf-7(+)
- atf-7(qd22)/atf-7(qd22 qd130)

The x-axis represents time in hours (0-200), and the y-axis represents the fraction alive (0.0-1.0). The different genotypes are represented by different line colors and markers.
