Figure S5

**Figure S5** Phenotype of the *Arabidopsis* zil2-1 mutant under zinc or iron deficiency. Effect of Zn deficiency under different MS strengths (A) and of ferrozine-induced Fe deficiency (B) on PR elongation of wild-type (Col-0) and zil2-1 or zil1-2 mutant seedlings. Results are representative of two independent experiments and values represent means ± SD (n=16). Asterisks denote statistically significant differences from the wild type under each condition (***P<0.001; Student’s t-test).
