S5 Fig: Galactose does not affect BR-F colony morphology in the used set-up. A, 3-day-old BR-F colonies grown on GMA plates were treated by galactose (120 μl of 10% galactose) applied to the wells and cultivated for 18 h. B, Untreated BR-F colonies of the same age grown on GMA plates. Yellow bar, 5 mm; green bar, 2 mm.
