

Table S1. Number of patients with Non-Hodgkin lymphoma (NHL) subtypes other than follicular lymphoma (FL).

Stage	Study	DLBCL ^a	CLL/SLL ^b	Marginal zone lymphoma	Mantle cell lymphoma	T-cell lymphoma	Other rare or unspec NHL ^c
3	NCI-SEER	160	66	51	24	37	130
	NSW	124	15	40	16	9	57
	Yale	125	38	28	10	27	72
	BC	163	37	68	43	50	90
	Mayo	193	327	61	53	34	175
	SCALE2	570	592	88	116	149	354
	SF2	257					
Total		1592	1075	336	262	306	878

^a Diffuse large B-cell lymphoma (DLBCL)

^b Chronic lymphocytic leukemia/small lymphocytic lymphoma (CLL/SLL)

^c Includes samples of patients with rare NHL subtypes such as lymphoplasmacytic lymphoma, hairy cell leukemia and prolymphocytic leukemia, unspecified B-cell NHL and unspecified NHL

Abbreviations: SCALE: Scandinavian lymphoma etiology, SF: San Francisco, NCI-SEER: National Cancer Institute, NSW: New South Wales, Yale: Yale University, BC: British Columbia, Mayo: Mayo Clinic.
