

Table S6 Characteristics of the MrOS Sweden fracture cohort		
	MrOS Sweden Fracture cohort	
	(n=3014)	
	mean	sd
Age, years	75,4	3,2
Men, %	100	
Height, cm	174,8	6,5
Weight, kg	80,8	12,1
<i>Subjects with validated incident fractures</i>		
	(n=3014)	
All fractures	388	(23,7)
Hip	90	(5,2)
<i>Prevalent Vertebral Fractures Among Men with an X-ray at baseline</i>		
	(n=1445)	
≥ 1 Fracture	225	(15,6%)

Values are given as mean ± SD. For incident fractures, the numbers of subjects with first fractures are given with the incidence/1000 person-years shown within parentheses. For prevalent X-ray verified vertebral fractures, the number of subjects with at least one fracture is given with percentage of the subjects within parentheses.
