\* In millions

† The total number of pregnancies at risk of malaria\* † In millions

‡ TPR is the total number of pregnancies is the sum of the number of live-births, stillbirths, miscarriages and induced abortions.

# Includes countries where *P. falciparum* and *P. vivax* co-exist

¶ Stable transmission: ≥0.1 autochthonous *P. falciparum* cases per 1,000 people per annum; unstable transmission <0.1 autochthonous *P. falciparum* cases per 1,000 people per annum

Abbreviation: TFR: Total Fertility Rate; TMR: Total Malaria Rate; TPR: Total Pregnancy Rate; TBR: Total Birth Rate; TDR: Total Death Rate; TDR: Total Disability Rate; TDR: Total Disability Rate. Note: The regional and total estimates for TFR, Stillbirth rate, TPR and pregnancy rates are weighted means. The regional and total numbers at risk was derived directly as the sum of the national estimates within each region and globally.

**Note:** The regional and total estimates for TFR, Stillbirth rate, TPR and pregnancy rates are weighted means. The regional and total numbers at risk was derived directly as the sum of the national estimates within each region and globally. Continents: The number in superscript after each country's name refers to the continent to which the country belongs: 1 = Africa; 2=Asia; 3=Oceania; 4=North America; 5=South America; 6=Europe

**Continents:** The number in superscript after each country's name refers to the continent to which the country belongs: 1 = Africa; 2=Asia; 3=Oceania; 4=North America; 5=South America; 6=Europe
