Figure S1. Coexpression of Delta1 and cyclin D in early mouse neuroepithelium. Double immunolabelling of Delta-1 mRNA and Cyclin D in coronal forebrain sections of E10.5 mouse embryos. A. Schematic representation of the embryo indicating the approximate position where the section was obtained. B. Confocal projection (85µm). C-C'' Confocal optical section (5µm) of the boxed area in B. Double labelled cells are indicated by arrows.
