Supporting information – Figure S1

Figure S1: Minor allele frequency (MAF) of SNPs typed for the HapMap CEU population [1] in the C2/CFB region. Locations of the SNPs within the genes are shown. Red lines/boxes show the locations of exons in C2 and green lines/boxes the locations of exons in CFB. White symbols represent SNPs not yet typed in any C2/CFB study [2, 3, 4] (including the present study), black filled symbols represent SNPs typed by Gold et al. [2] and grey filled symbols represent SNPs typed in C2/CFB study [4] other than the Gold et al. study [2]. Grey lines and circles correspond to SNPs in C2 and black lines and dimonds correspond to SNPs in CFB.
