Figure S2. Nuclear localization of TFE3 in the Flcn-null MEFs. (A) Cells were plated on chamber slides and TFE3 proteins were probed with rabbit polyclonal anti-TFE3 antibody (1:450 dilutions) as described in Materials and Methods. Nuclei were counter-stained with DAPI. (B) Immunohistochemical staining of TFE3 in the renal tumors and adjacent normal kidney tissues from BHD patients, and in the alveolar soft part sarcoma.
