Figure S6

IDENTICAL FORAGERS

mean gain ($\gamma$) of both individuals

mean number of times (± s.d.) pair members are synchronised during 2,500 timesteps

mean loss ($\kappa$) of both individuals

s.d. loss ($\sigma$) of both individuals

switchpoint ($s$) of both individuals

NON-IDENTICAL FORAGERS

mean gain ($\gamma_b$) of individual B

mean number of times (± s.d.) pair members are synchronised during 2,500 timesteps

mean loss ($\kappa_b$) of individual B

s.d. loss ($\sigma_b$) of individual B

switchpoint ($s_b$) of individual B
