Figure S5

Plot showing the pathways involving 4 or mutated kinases.

- Signaling in Immune system: 31
- Axon guidance: 18
- Hemostasis: 16
- Signalling by NGF: 14
- Signaling by insulin receptor: 9
- Signaling by GPCR: 8
- Cell Cycle, Mitotic: 8
- Synaptic Transmission: 7
- Signaling by FGFR: 7
- HIV Infection: 6
- Gene Expression: 6
- Apoptosis: 6
- Integrin cell surface interactions: 5
- Cell Cycle Checkpoints: 5
- Signaling by Rho GTPases: 4
- Signaling by PDGF: 4
- Signaling by EGFR: 4
- Interactions of the immunoglobulin superfamily: 4
- DNA Replication: 4

Mutated Kinases

Pathway name
