For the categorical variables High APOBEC3C= mRNA expression ≥ 2-fold above mean; Low APOBEC3C= mRNA expression <2-fold above mean; High APOBEC3G= mRNA expression ≥ 2-fold above mean; Low APOBEC3G= mRNA expression <2-fold above mean; Age was evaluated as a continuous variable. The hazard ratio (HR) for all reference variables was set to 1. P-value < 0.05 was considered statistically significant.
