Figure S5. Cross-sectional correlates of baseline levels of VWF.

- Loge t-PA antigen, ng/mL
- Loge D-dimer, ng/mL
- Body mass index, kg/m²
- Systolic blood pressure, mmHg
- Total cholesterol, mmol/L
- Loge triglycerides, mmol/L
- Loge lipoprotein(a), mg/L
- Loge interleukin 6, ng/L
- Loge C-reactive protein, mg/L
- Hematocrit, %
- Hemoglobin, g/L
- Loge erythrocyte sedimentation rate, mm/hr

Geometric mean VWF, IU/dL (95% CI), log scale

Response means are adjusted to age 55

Mean for quintiles of risk factor

- male
- female
