B

Molecular function

- transition metal ion binding
- protein kinase activity
- transcription regulator activity
- signal transducer activity
- zinc ion binding
- peptidase activity
- purine ribonucleotide binding
- transferase activity, transferring...
- catalytic activity
- ATP binding
- purine nucleotide binding
- nucleotide binding
- peptidase activity, acting on L-amino acid...
- ATPase activity
- ligase activity
- hydrolase activity, acting on acid anhydrides
- nucleoside-triphosphatase activity
- ion channel activity
- channel activity
- ATPase activity, coupled
- transporter activity
- active transmembrane transporter activity
- metal ion binding
- ion binding
- phosphatase activity
- cation binding
- binding
- transferase activity, transferring acyl groups

GO term fraction
