Figure S9. Diagnostic search sequence for AtWRI1 3’ end. A) The flanking sequence upstream from the last intron which is spliced out in AtWRI1 splice form 1 was chosen as a diagnostic search sequence for the 3’ end splice form search. B) Position of the diagnostic search sequence for WRI1 3’ end is highlighted by red boxes in alignment of predicted partial cDNAs of three AtWRI1 alternative splice forms.
