Figure S1
Flatfish (*Pleuronectiformes*) in an evolutionary context. Adapted from the phylogeny at [http://cichlidresearch.com/fish_html/cactinop.html](http://cichlidresearch.com/fish_html/cactinop.html) (Nelson 2006). Tetraodontiformes (Fugu, Tetraodon) and Perciformes (cichlid, tilapia, sea bass, seabream, perch) are close phylogenetic relatives of Pleuronectiformes (turbot, halibut, sole).
