Figure S4. *Sma*I PFGE of second generation transconjugants (TCs) (lanes 6-8, 11-13 and 15-17) showing divergent band patterns compared with the first generation transconjugant donors (lanes 5, 10 and 14) and similar pattern with recipient BM4105-Str (lane 4). Lanes 1, 9 and 18 low-range PFGE marker, lane 2 *vanB* positive control *E. faecalis* V583, lane 3 *rep*<sub>17/gRUM</sub> positive control *E. faecium* U37, lane 5 donor VRE0726x64/3, lanes 6-8 TCs VRE0726x64/3xBM4105-Str, lane 10 donor VRE0734x64/3, lanes 11-13 TCs VRE0734x64/3xBM4105-Str, lane 14 donor VRE0881x64/3, lanes 15-17 TCs VRE0881x64/3xBM4105-Str.
