Figure S2

Thymoma-associated MG (TAMG)

The graph shows the distribution of Thymoma-associated MG (TAMG) across different age ranges. The equation used to model the distribution is:

\[
y = -8E-05x^4 + 0.0052x^3 - 0.1268x^4 + 1.3953x^3 - 6.8551x^2 + 14.417x - 9.5083
\]

with \( R^2 = 0.8933 \).
