S3 Appendix DAPC results

Results of k-means clustering for a) all 2006 larvae, b) 2006 larvae less than 8 mm TL and with a >90% hatch location certainty, c) all 2007 larvae, and d) 2007 larvae less than 8 mm TL and with a >90% hatch location certainty. K-means clustering searches for the clusters of each size that minimize the Bayesian Information Criterion (BIC).

Density plot of individuals against value of first discriminant function for a) all 2006 larvae, b) 2006 larvae less than 8 mm TL and with a >90% hatch location certainty, c) all 2007 larvae, and d) 2007 larvae less than 8 mm TL and with a >90% hatch location certainty
