**S2 Fig. Rcn1 does not enhance phagocytosis of latex beads by microglia.** BV-2 cells were incubated with FITC-labeled latex beads in the presence of GST-Rcn1 or GST control (100 nM) for phagocytosis, as described in Fig. 2B. Bar = 50 µm. (B) Percentage of BV-2 cells with phagocytosed cargos in (A) were quantified by ImageJ (± s.e.m., n=3, t-test).
