S4 Fig. MeJA-dependent changes in transcript levels in fin219-2 mutant under FR light (10 µmol m$^{-2}$ s$^{-1}$). Changes in mRNA levels before (A) and after (B) 50 µM MeJA treatment. The intensity of expression ratios from the wild type (gBGSubSignal) and fin219-2 mutant (rBGSubSignal) are shown on the x- and y-axis, respectively.
