S1 File. The gene model for RcXIP2;1 and RcXIP3;1. A, The coding region is marked with uppercase letters (the intergenic spacer between RcXIP2;1 and RcXIP3;1 is also shown in uppercase letters but labeled with single underlines), under which is its deduced amino acids. The introns are marked with lowercase letters. The start and stop codons are blacked. B, Read-mapping graphical representation of RcXIP2;1. C, Read-mapping graphical representation of RcXIP3;1.

(A)
