S2 Fig. Reduced transmission: prevalence in the stable units six years after introduction

Note: Mat = mating unit, Gest = gestation unit, Far = farrowing unit, Wean = weaner unit, Fin = finisher unit. Mat = mating unit, Gest = Gestation unit, Far = farrowing unit, Wean = weaner unit, Fin = finisher unit. Transmission was reduced 180 days after MRSA had been introduced.

The widths of the violin plots illustrate the distribution of 500 iterations. The median prevalence is indicated by white dots.
