

S3 Table. Hospital Care Process Measures of Pre-Intervention and Post-Intervention Groups, in Subset of Patients with Definite Infective Endocarditis.

Outcome (%)	Pre-intervention (n=69)	Post-intervention (n=56)	p value
Assessments performed			
Cardiac surgery	50 (72.5)	33 (58.9)	0.13
Cardiology	48 (69.6)	51 (91.1)	<i>0.004</i>
Infectious diseases	69 (100)	55 (98.2)	0.45
Cardiac surgery performed	15 (21.7)	25 (44.6)	<i>0.007</i>
Median time from admission to surgery, in days (interquartile range)	7 (4–13.5)	7 (4–11)	0.78
Appropriate antimicrobial agent	69 (100)	56 (100)	0.78
Appropriate antimicrobial duration	69 (100)	56 (100)	1
Follow-up*			
Cardiac surgery	13 (22.8)	14 (33.3)	0.26
Cardiology	11 (19.3)	13 (31.0)	0.54
Infectious diseases	37 (64.9)	24 (57.1)	0.53

*Excluding in-hospital deaths (pre-intervention: n=57, post-intervention: n=42)
