

Figure S2. Cytokine production by CD4 and/or CD8 T cells **(A)** Heat map depicting frequency of cytokine producing CD4⁺ and CD8⁺ T cells within viable CD3⁺ T cells. All data are background subtracted, and only positive values are retained. . **(B)** An example of positive response (NS2P7 response in PT#6), depicting the cellular source of the cytokines. The red dots represent cytokine⁺ T cells and the grey dots are ViViD⁻ CD3⁺ T cell.
