

ADAPI
MAP2**B**DAPI
TUBB3**C**DAPI
GAD65/67

Figure S1. Terminally differentiated neurons derived from N ESCs. In the absence of specific growth factors, N ESCs give rise to mature neurons positive for neuronal markers such as MAP2 (A), TUBB3 (B), and for GAD65-67 (C), a GABAergic-specific protein. Bar scale 100 μ m.
