
S 1. Table. Range of values and setting of eRWT for the different clinical parameters.

Parameters	Lower Bound	Upper Bound	μ	ν
Ejection Fraction (<i>LVEF</i>)	0	1	2.85	3.4
End-Diastolic Volume (<i>EDV</i>)	30 ml	505 ml	2.5	5.5
End-Systolic Volume (<i>ESV</i>)	0 ml	450 ml	2	5.75
End-Systolic Volume* (<i>ESV*</i>)	0 ml	305 ml	2.85	3.15
Stroke Volume (<i>SV</i>)	10 ml	165 ml	3.15	5.25
Epicardial Volume (<i>EpV</i>)	75 ml	750 ml	2.5	2.25
Myocardial Mass (<i>MM</i>)	25 g	360 g	2.5	5.6

*ESV** is defined by removing one subject from the population, this subject presenting a very large end systolic volume.
