S1 Table. A genomic _gOBE3_ fragment suppresses the effects of the _wen9_ mutation.

Construct	n	% of the transformants		
		wt-like	no shoot	_wus-6_-like
gOBE3	56	66.1	0.0	33.9
Control, empty vector	22	77.3	22.7	0.0

T1 seedlings of transformed _wus-6/+_ mother plants were selected on hygromycin supplemented media for 12 days and then transferred to soil for phenotypic analysis at 30 DAG.

wus-6 like: indeterminate shoot but prematurely terminated floral meristems
