

Supplementary figures

Figure A. Images from immunoblotting of APOE and ATP synthase β in control and 1.0 Gy irradiated heart lysates at 6 months and 2 years.

Figure B. Images from immunoblotting of PRDX5 and ATP synthase β in control and 1.0 Gy irradiated heart lysates at 6 months and 2 years.

Figure C. Images from immunoblotting of LDB3 and ATP synthase β in control and 1.0 Gy irradiated heart lysates at 6 months and 2 years.

Figure D. Images from immunoblotting of phospho-MAP4K4 (Ser-801), vimentin and ATP synthase β in control and 1.0 Gy irradiated heart lysates at 6 months and 2 years.
