

Figure S2. Mean AOR regression statistics for simulations with negative binomial (NB) parameters held constant. Results are given for relationships estimated with global mean abundance, GMA (A-C) and local mean abundance, LMA (D-F). In each plot, 95% confidence intervals are color-coded by region. Regions included are the Gulf of Maine (GOM), Georges Bank (GB), Southern New England (SNE), and the Mid-Atlantic Bight (MAB).
