

Stable Hydrogen Isotope Variability within and among Plumage Tracts ($\delta^2\text{H}_F$) of a Migratory Wood Warbler

S5 Table. Pearson correlation coefficients (r) for $\delta^2\text{H}_F$ values of pairwise combinations of primaries (P1-P9) sampled within individual black-throated blue warblers. 2013 males ($n = 12-15$) above the diagonal and 2014 males ($n = 17$) below the diagonal. Correlation coefficients ≥ 0.80 are shaded with yellow.

	P1	P2	P3	P4	P5	P6	P7	P8	P9
P1		0.92	0.76	0.81	0.58	0.52	0.81	0.82	0.82
P2	0.86		0.84	0.82	0.58	0.74	0.86	0.84	0.78
P3	0.50	0.78		0.80	0.64	0.48	0.56	0.60	0.55
P4	0.53	0.68	0.62		0.61	0.26	0.68	0.82	0.70
P5	0.47	0.49	0.18	0.59		0.53	0.56	0.48	0.30
P6	0.36	0.42	0.30	0.69	0.54		0.57	0.40	0.35
P7	0.19	0.38	0.59	0.67	0.53	0.72		0.89	0.85
P8	0.30	0.39	0.42	0.66	0.57	0.62	0.82		0.91
P9	0.22	0.28	0.25	0.54	0.31	0.69	0.51	0.61
