Figure S1

(A) Morphology and color of 7-day old colonies of each strain on oatmeal agar media.
(B) Morphology and color of conidia from the same cultures in panel A. Bars = 20 μm.

Figure S1. Colony and conidia morphology of wild type, Δdes1 and DES1-T-DNA.

(A) Morphology and color of 7-day old colonies of each strain on oatmeal agar media.
(B) Morphology and color of conidia from the same cultures in panel A. Bars = 20 μm.
