**Figure S10**

**A**

Western blot analysis showing β-catenin and β-actin expression levels.

**B**

Graph depicting the normalized cell numbers over time (Hrs) for different cell lines: HT29 C2, HT29 C2-TX20005, HT29 B2, and HT29 B2-TX20005. The x-axis represents time in hours (0, 24, 48), and the y-axis represents normalized cell numbers. Each line shows a significant increase in cell numbers over time, with HT29 B2-TX20005 showing the most significant increase.

**C**

Bar graph showing adherence (%) for the following cell lines: HT29, HT29-DMSO, HT29-CRT3, HT29-shControl, HT29-shβ-catenin. All conditions exhibit similar adherence percentages, with no significant differences observed.

*Indicates significance level.
