

Table S3. *ins-7*, but not *ins-11*, is required for resistance to PA14

Strain	Mean time to death (hr)	SEM	N dead¹	N total²	P-value vs N2	P-value vs <i>ins-7</i>
N2	117.02	4.611	184	188	-	-
<i>ins-7(tm1907)</i>	162.36	6.055	131	143	<0.0001	-
<i>ins-11(tm1053)</i>	129.73	5.481	144	148	0.0902	0.0002

Worms were sterilized by RNAi knockdown of *cdc-25.1*. Glp worms were exposed to PA14 and survival was monitored over time. ¹ Number of deaths observed. ² Total number of observations: N dead + N censored.
