

**S1 Table. Summary of the number of unique peptide sequences and identified proteins recovered from NMRI and BS-90 *B. glabrata* plasma samples following elution from Mem and LTP affinity columns**

<b>Mem (Sporocyst Membrane Proteins)</b>		
	<b>NMRI</b>	<b>BS-90</b>
# unique peptides	564	480
# protein ID	58	51
# unidentified proteins	5	2

  

<b>LTP (Larval Transformation Proteins)</b>		
	<b>NMRI</b>	<b>BS-90</b>
# unique peptides	531	451
# protein ID	45	36
# unidentified proteins	3	1
