EDITORIAL NOTE

Editorial Note: A panel data study on the effect of climate change on life expectancy

The PLOS Climate Editors

After this article [1] was published, concerns were raised about the reliability of global mean annual temperature data that are discussed in the article and used in the study's analyses. The source of these data is reported as [2] in the article's Materials and methods section, and as [3] in the Fig 4 legend.

PLOS Climate is looking into the concerns that have been raised. Meanwhile, readers are advised to interpret this article's results with caution.
