47

5. Number of sachets remaining / number of sachets should be remaining (Analyst only):

$$\underline{\quad 44 \quad} / \underline{\quad 47 \quad} = \underline{\quad 93.6 \quad} \%$$

## **Probes**

**Question 1.** You have **XX** MNP sachets remaining. Explain how easy or difficult it was to use the MNP product on a daily basis for your child 6 – 23 months? (Circle one answer)

**Very Difficult**

**Difficult**

**(Easy)**

**Very Easy**

**Question 2.** Describe any specific challenges that you faced that made the MNP difficult to use on a daily basis?

There was no challenge. In the beginning days I had to forcefully feed the child the kunu that is mixed with MNP but gradually she is used to it now and she asks for the kunu herself.

**Question 3.** Describe specific aspects of the MNP product that you or your child enjoyed that made it easier to use on a daily basis?

Since I started giving her MNP I noticed that she has added weight and has better appetite. She eats more than before. I also noticed that she is healthier and has not had any illness since then. Breastfeeding has increased also and she has so much energy.

**Question 4.** What questions do you have about the MNP based on your experience using it?

What should I do if I miss a day of administering the MNP?

**Question 5.** What specific recommendations do you have that we can do as a program to make the MNP easier to use on a daily basis?

The only recommendation is to bring more of this product to our community.
