45

5. Number of sachets remaining / number of sachets should be remaining(Analyst only):

42 / 45 = 93.3 %

Probes

Question 1. You have **XX** MNP sachets remaining. Explain how easy or difficult it was to use the MNP product on a daily basis for your child 6 – 23 months? (Circle one answer)

Very Difficult

Difficult

Easy

Very Easy

Question 2. Describe any specific challenges that you faced that made the MNP difficult to use on a daily basis?

Question 3. Describe specific aspects of the MNP product that you or your child enjoyed that made it easier to use on a daily basis?

The powder is to be used with kunu which is easy and fast to prepare. It also goes with food taken as breakfast were one is still strong to prepare the food. The MNP also dissolves well with the food and doesn't affect the taste. So the child barely notice any changes in her food

Question 4. What questions do you have about the MNP based on your experience using it?

The child had been experiencing diarrhea since we started using the MNP, though it's subsiding gradually. It there any reason to panic or use any other drug to treat the diarrhea?

Question 5. What specific recommendations do you have that we can do as a program to make the MNP easier to use on a daily basis?

Presently, I have no idea because you've tried so far. My concern is continuity of the program so that the whole community will benefit from it.
