

## Correction: Components of Coated Vesicles and Nuclear Pore Complexes Share a Common Molecular Architecture

Damien Devos, Svetlana Dokudovskaya, Frank Alber, Rosemary Williams, Brian T. Chait, Andrej Sali, Michael P. Rout

DOI: 10.1371/journal.pbio.0020380

In *PLoS Biology*, volume 2, issue 12.

In Materials and Methods, the sentence “The magnetic beads were added to the extract to a ratio of about  $8 \times 10^9$  beads per g of cells” contains an error. The correct amount of beads is  $8 \times 10^8$ , i.e., ten times less.

This correction note may be found online at DOI: 10.1371/journal.pbio.0030080.
