S2 Fig. Maternal obesity does not affect Pomc or Agrp cell numbers. Representative image and quantification of the number of Pomc- and Agrp mRNA-expressing cells in the ARH of P14 neonates born to dams fed a chow or a HFHS diet (n = 6-9 per group). Data are presented as mean + SEM. Statistical significance was determined by unpaired two-tailed Student’s t test. Scale bar, 50 µm. The underlying data are provided in S1 Data.
