92 **S5 Fig. Schematic of SARS-CoV-2 spike protein peptide pools and representative gating**
93 **strategy for flow cytometry.**

94 (A) Summary schematic of the 6 peptide pools of the SARS-CoV-2 spike protein used for
95 stimulating T cells in mouse splenocytes.

96 (B) Representative gating strategy illustrating splenocyte population being subgated to CD44
97 and CD62L expressing CD4⁺ and CD8⁺ cells.

98 (C) Representative gating strategy illustrating splenocyte population being subgated to TNF α ,
99 IL4, IL2 and IFN γ expressing CD4⁺ and CD8⁺ cells.
