The Kaplan–Meier survival estimates for ENSG00000063587 are shown in the graph. The survival time is plotted on the x-axis, while the survival probability is plotted on the y-axis. The survival probability is shown for two groups: group 0 (103) represented by blue line, and group 1 (37) represented by green line. The survival probability decreases over time for both groups, indicating that the survival time is shorter as time progresses.
