^{*} Median absolute percentage error between S_{obs} and \hat{S}_{obs}

[†] Low curvatures C_p in range $0.016 \leq C_p \leq 0.101$, intermediate curvatures in range $0.11 \leq C_p \leq 0.62$

[‡] p-value of the significance of the differences between the errors of *DivE* and each other estimator, for each curvature range.
