A scatter plot showing the relationship between \(-\log_{10}(\text{CGEMS p-value})\) and \(-\log_{10}(\text{1000G p-value})\). The x-axis represents the \(-\log_{10}(\text{CGEMS p-value})\), and the y-axis represents the \(-\log_{10}(\text{1000G p-value})\). The points are color-coded to represent different size percentiles, with a legend indicating 99, 50, and 1.
