

Supplementary Figure 2. Genetic analysis of rapid-cycling accessions.

Flowering times of F₁ progeny from crosses of accessions that do not carry *Ler*- or *Col*-type deletions in *FRI* to *fri-Col flc-3* (white), *FRI-Sf2 flc-3* (gray), *fri-Col FLC* (black), *FRI-Sf2 FLC* (striped). (A) F₁ progeny in which *FRI* causes late flowering. (B) F₁ progeny in which *FLC* causes late flowering. (C) F₁ progeny in which only simultaneous introduction of *FRI* and *FLC* causes late flowering.
